Introduction

This training addendum highlights the major changes and additions to the CompleteView VMS software with the release of CompleteViewVersion 6.1.0.32.

Addressed changes by Category:

Camera Process Panel- Stream Processing

- Updated stream processing description

Playback - Search Video

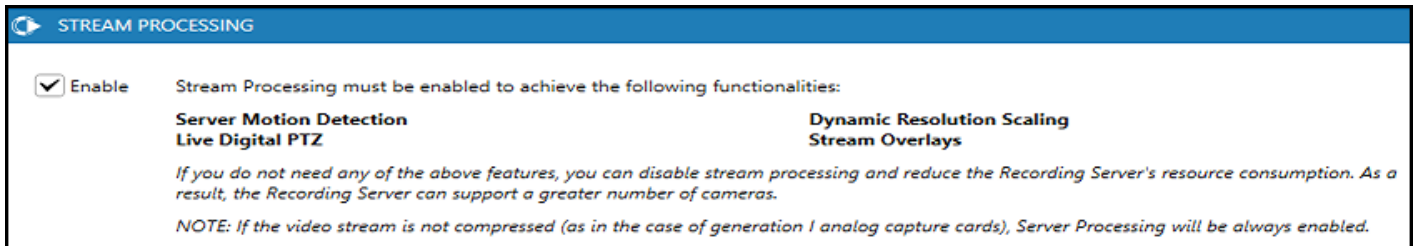

- Expand and Collapse search results

Camera Process Panel

The Process Panel allows access to ancillary camera features. The panel is divided into four parts, Stream Processing, Stream Overlays, Dynamic Video Decoding, and Dynamic Frame Throttling. These settings are grouped because they allow the Administrator to adjust some of CompleteView's back-end performance settings. Unless necessary, it's best practice to leave settings set to the defaults.

Stream Processing

CompleteView performs Stream Processing on the incoming video stream to provide advanced functionality, including Dynamic Resolution Scaling, Live Digital PTZ, Server Motion Detection, and Stream Overlays. It is strongly recommended to leave Stream Processing enabled.

The screenshot shows a configuration panel titled "STREAM PROCESSING" with a blue header. Below the header, there is a checked checkbox labeled "Enable". To the right of the checkbox, text states: "Stream Processing must be enabled to achieve the following functionalities:". Below this text, two columns of features are listed: "Server Motion Detection" and "Live Digital PTZ" on the left, and "Dynamic Resolution Scaling" and "Stream Overlays" on the right. A paragraph of text follows: "If you do not need any of the above features, you can disable stream processing and reduce the Recording Server's resource consumption. As a result, the Recording Server can support a greater number of cameras." At the bottom, a note reads: "NOTE: If the video stream is not compressed (as in the case of generation I analog capture cards), Server Processing will be always enabled."

Collapse and Expand Search Results

In Playback, the Search by list or Search by Thumbnails results may be collapsed and expanded using the directional icon located in the top left of the search video pane. Collapsing the results will maximize the video playback window, whereas expanding (the default setting) will display both the search results and the playback window.

Expanded View

The screenshot shows the Salient interface in Expanded View. The top navigation bar includes HOME, LIVE VIEW, DASHBOARD, and MAINTENANC. The search pane on the left contains the following search criteria:

- Server: TRS-1
- Camera: 1 - Office-1
- Start Time: 9/6/2021 11:59:59 PM
- End Time: 10/13/2021 11:59:59 PM
- Time Zone: Local
- Smart Search:

The Search Results table is displayed below the search criteria:

TYPE	START TIME	END TIME	DESCRIPTION	FILE SIZE (KB)
■	10/4/2021 8:38:13 A	10/4/2021 4:21:15 P		300659
■	10/5/2021 10:21:17	10/5/2021 4:18:18 P		227051
■	10/7/2021 11:47:29	10/7/2021 11:53:35		4030
■	10/7/2021 11:53:39	10/7/2021 12:04:28		7089
■	10/7/2021 12:05:02	10/7/2021 12:33:18		19931
■	10/7/2021 12:33:23	10/7/2021 12:44:57		7367

The video playback window on the right shows a security camera feed of an office interior. The playback controls at the bottom include a timeline with markers for 10/4/2021 8:38:13 AM, 10/4/2021 8:39:02 AM, and 10/4/2021 4:21:15 PM. A red box highlights the collapse icon in the top left of the search pane.

Collapsed View

The screenshot shows the Salient interface in Collapsed View. The search results table is hidden, and the video playback window is maximized. The top navigation bar and search pane are visible. A red box highlights the expand icon in the top left of the search pane.

Additional Resources

Visit the Salient website, www.salientsys.com, for additional support and CompleteView training:

- Manuals & Documentation (<https://support.salientsys.com/hc/en-us/categories/115000292747-Knowledge-Base>) – Includes all relevant manuals.
- Online Tech Support (<https://support.salientsys.com/hc/en-us>) – Get quick access to online tech support modules that cover the most frequently asked product questions, such as “Adding IP Camera Licenses.”
- CompleteView™ Classroom Certification – Instructor-led two (2)-day course, held in a virtual classroom setting, designed to provide you with certification on CompleteView video management software.
- Certification is valid for two years. Please visit the Salient student registration portal at <https://salientsys.gosignmeup.com/public/course/browse>. Contact training@salientsys.com for questions.
