CCURE•9000 INTEGRATION

With Salient's CompleteView™ Video Management System and the CCURE•9000 security and event management system, you can correlate video with access control event information in one powerful interface. The combination allows full interaction with live video and recording, turning the physical security interface into a full-featured video security solution.

CompleteView delivers everything you need to manage your video surveillance system – from a single server with a few cameras to a multi-server, multi-site enterprise installation with unlimited clients. Analog, IP, megapixel and HD video feeds can all be incorporated seamlessly into a CCURE•9000 system. You can instantly access, monitor and review live and recorded video from any camera connected to any CompleteView recording server in the system. Additionally, video and access events are correlated in the CCURE•9000 interface, allowing users to control camera actions such as 'record on event' and 'move to PTZ preset location'. Alerts and incidents can be further reviewed through CompleteView's client investigation tools.

With a comprehensive set of fully integrated video and access control security features, the CCURE•9000 and CompleteView VMS solution provides actionable information with live viewing and playback features, advanced PTZ controls and email notification capabilities for a faster response to security incidents.

FEATURES

Seamlessly integrates with CCURE•9000 security and event management system

Full interaction with CompleteView video and recordings

Supports analog, IP, megapixel, and HD video feeds into CCURE•9000 interface

Trigger recording on any camera and control PTZ camera movements with CCURE•9000 events

Simultaneous support for MJPEG, MPEG-4 and H.264 video formats

Built-in support for analog cameras, IP cameras and encoders

Per-camera configuration of all video streaming and recording parameters including resolution, frame rate, schedule, motion and event recording and storage/location

Display single camera or entire camera group views in CCURE•9000

Change cameras 'on-the-fly' to any camera in the system
