
PRO-WATCH INTEGRATION

With Salient Systems' CompleteView™ Video Management System and the Pro-Watch Access security and event management system, you can correlate video with access control event information in one powerful interface. The combination allows full interaction with live video and recording, turning the physical security interface into a full-featured video security solution.

CompleteView delivers everything you need to manage your video surveillance system from a single server with a few cameras to a multi-server, multi-site enterprise installation with unlimited clients. Analog, IP, megapixel and HD video feeds can all be incorporated seamlessly into Pro-Watch / CompleteView system. You can instantly access, monitor and review live and recorded video from any camera connected to any CompleteView recording server in the system. Alerts and incidents can be further reviewed through CompleteView's client investigation tools.

With a comprehensive set of fully-integrated video and access control security features, the Pro-Watch and CompleteView VMS solution provides actionable information with live viewing and playback features, advanced PTZ controls and email notification capabilities for a faster response to security incidents.

FEATURES

Designated doors are associated with alarms and events from Pro-Watch.

CompleteView receives events from Pro-Watch server.

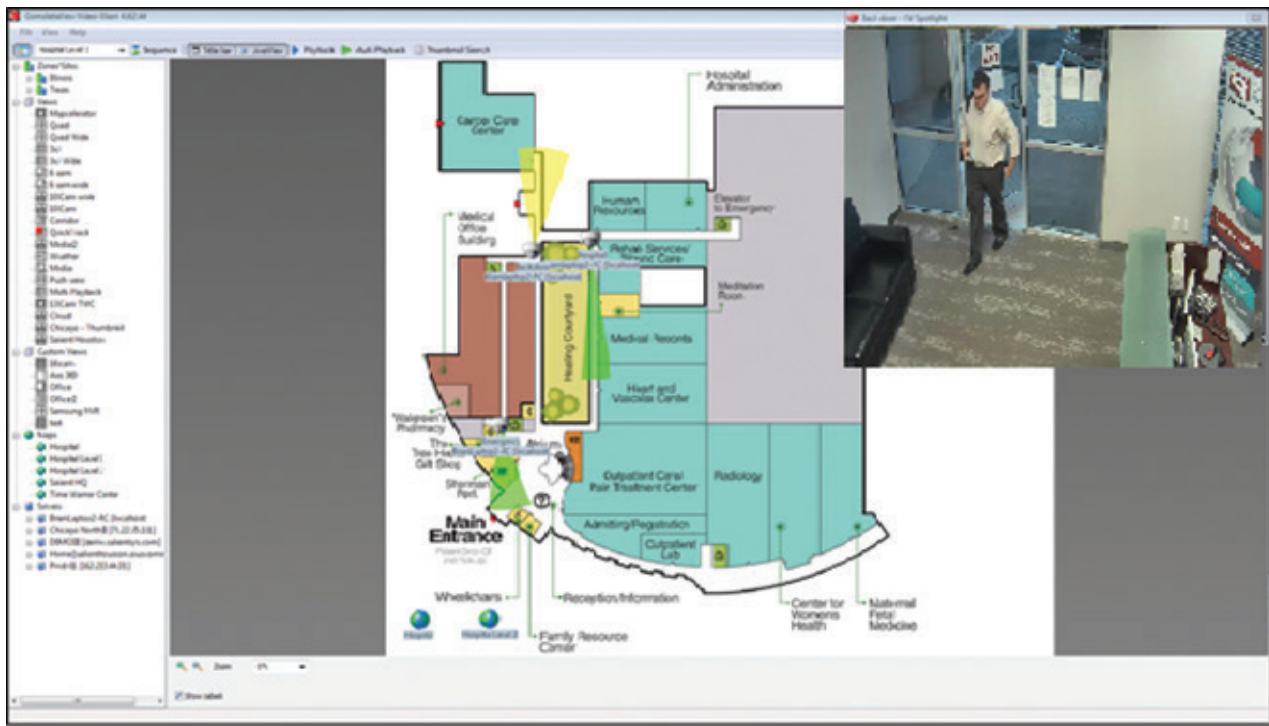

Triggered camera actions based on events from Pro-Watch. Actions include alarm and motion recording and PTZ presets.
