

Q1 2021 ***SALIENT HIGHLIGHTS***

This is a quick highlight of some of the key capabilities in CompleteView v5.5.0, introduced in Salient's Q1 2021 release.

IMPORT AND EXPORT CAMERAS

Administrators can now export camera information for either a single recording server or all recording servers. Additionally, Administrators can also import cameras using both 4.x and 5.x formats. With this capability, it is much easier to back-up, restore, move, or analyze the cameras deployed in a system.

	A	B	C	D	E	F
	Name	IP Address	Manufacturer	Model	Channel Count	Channel
1	Test 1	172.18.2.1	Axis	P3353	1	
2	Test 2	172.18.2.1	Axis	P3353	1	
3	Test 3	172.18.2.1	Axis	P3353	1	
4	Test 4	172.18.2.1	Axis	P3353	1	
5	Test 5	172.18.2.1	Axis	P3353	1	
6	Test 5	172.18.2.1	Axis	P3353	1

<input checked="" type="checkbox"/>	7	Test 5	Network	172.18.2.111	Axis P3353	1

EXPORT SERVER CONFIGURATION

Administrators can now export server configuration to a user readable CSV file. This can be used for project signoff, asset management, or troubleshooting purposes.

MULTIPLE DESKTOP CLIENT INSTANCES

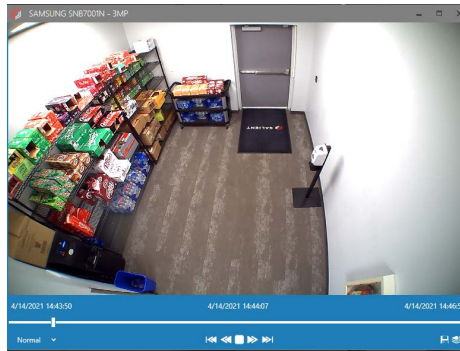

Users can now open more than one instance of the desktop client on a workstation using the same login credentials. One common and powerful use of this capability is to have one instance dedicated to live viewing while having another instance dedicated to reviewing and exporting video clips.

POP-UP QUICK REVIEW

Users can now perform a quick review in a pop-out window. This can be helpful in simultaneously watching both a live view and previously recorded video from the same camera.

Pop-Up Review Context Menu

ADD NOTES TO SERVER, CAMERAS, USERS, ETC.

Administrators can now add a note to servers, views, cameras, and users/groups. This can be used to communicate with other Administrators or to keep helpful details and tips readily accessible.

Buttons: + Add, Clone, Add From CSV, Export to CSV, X Remove

Warning: Camera offline. Need to replace once RMA is received.

999 DAYS OF RETENTION

With CompleteView v5.5.0, you can set the retention time on recordings to a maximum 999 days. This can be useful for projects with unique regulatory requirements that need long retention spans.

With an active subscription or with a valid Software Maintenance Agreement, you can update to this version of CompleteView at no additional cost. To learn more about these capabilities, reach out to your Salient contact for more information or a demo.
