

Salient's platform empowers organizations to view, record, and manage video data. Built with an open architecture, CompleteView VMS is integrated with thousands of cameras, access control, and analytics solutions. Find out how Salient's platform can drive your business operations with actionable video intelligence.

GO BEYOND SECURITY

With Salient's Open Cloud Video Data Platform

SALIENT

OPEN CLOUD VIDEO DATA PLATFORM

SALIENT PLATFORM COMPONENTS

CompleteView	Next-generation video management software
CompleteView iOS	Easily and instantly access live video, playback, and control cameras with PTZ functions from your phone
LPRTTracker	Powerful license plate recognition recording and alerting capability
TransactionTracker	Synchronize POS transactions, video data, and exception-based reporting systems
ViewPoint	Turn any desktop computer screen into a video feed for monitoring computer activity

SCALABLE

Salient's open video data platform grows with your security operations, from a single user or small team to individual scale security organizations designed around the world.

OPEN

Salient's open architecture enables your organization to seamlessly leverage existing technology's investments and minimize disruption as hardware and software infrastructure changes over time.

EASY TO USE

Minimize the complexity of displaying, managing and growing best in-class video surveillance operations with Salient.

Salient offers an easy, scalable, and open Video Management Software platform along with server appliances that support a variety of deployment options.

PLATFORM

Whether you are a small business, a large global enterprise, or something in-between, CompleteView brings deployment simplicity and unmatched scalability.

APPLIANCES

The PowerProtect platform is engineered for continuous and durability and offers a wide range of powerful workforce and NVRs to match your unique requirements.

COMPLETEVIEW EDITIONS

CompleteView is available in 3 different editions. Learn more about the differences between editions and understand which is most appropriate for your needs.

One	Pro	Enterprise
Ideal for businesses which need a single standalone server without centralized management or enterprise authentication. Supports web and mobile clients.	Ideal for businesses which require multiple servers and centralized management without enterprise authentication or failover. Supports an unlimited number of cameras and clients.	Ideal for enterprises with distributed deployments that require AD/LDAP integration and failover.

Synchronous Playback	√	√	√

ENTERPRISE	ONE	PRO	ENTERPRISE
Centralized User Management		√	√
Recording Server Failover (N+1)			√
Active Directory Integration			√

COMPLETEVIEW VMS HIGHLIGHTS

Interactive Mapping

Plot and view cameras on satellite-based GPS maps or custom images such as building floorplans and associate maps with views. Receive visual alerts on events, dynamically create views from cameras on maps, and display corresponding maps for cameras in Alarm View.

Custom Tabs

Create tabs from individual cameras and view layouts, just like web browser tabs. Keep important cameras readily available for immediate viewing.

Text Search

Search for events, cameras, and views across all NVRs by typing key words into a search box.

Density and Bandwidth

With multi-streaming and dynamic resolution scaling, effectively utilize bandwidth, compute, and storage resources to minimize network and hardware costs.

Free Web and Mobile Clients

Consistent web and mobile experience at no extra cost, with no additional servers to access live and recorded video, preconfigured views and maps.

QuickTrack

Easily capture live video across multiple cameras by having CompleteView seamlessly stitch video into a single clip. Subsequently find, review, and export the entire incident as one event.

Access Control Integrations

CompleteView provides free integrations with over 20 different industry-leading access control solutions. With CompleteView's bi-directional access control integrations, search for events and alarms from access control solutions within CompleteView and pull up video within your access control solution.
