

# BRIVO ONAIR INTEGRATION

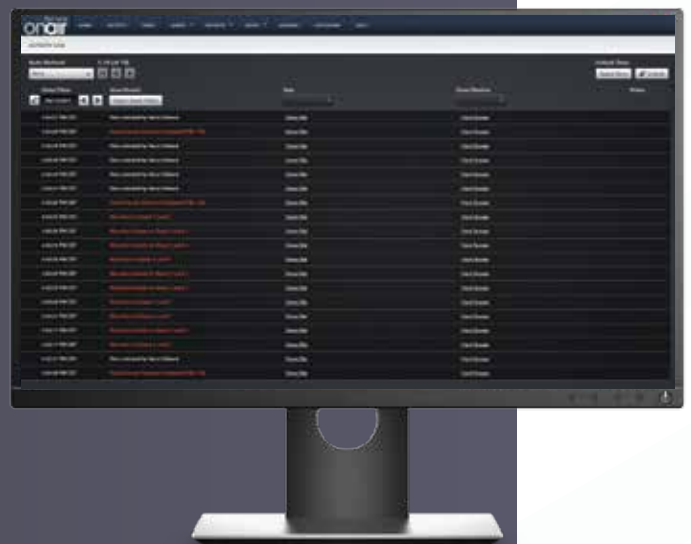

Brivo OnAir provides advanced security solutions for Cloud-based access control. As a Certified Brivo OnAir partner, Salient's CompleteView™ Video Management System is fully integrated to provide video with access control event information.

With a comprehensive set of integrated video and access control features, Brivo OnAir and CompleteView VMS provide video from an unlimited number of cameras, at multiple sites, connected to multiple servers. Brivo OnAir provides hosted entry control, video, and ID badging for unlimited sites, devices and doors. You don't have to cover the high costs of deploying or managing IT infrastructure or software. Powerful features like per-camera configuration of all video streaming and recording parameters, advanced PTZ control on event, live video and recorded video, and simultaneous support for multiple video formats including Motion JPEG, MPEG4 and H.264 are available.

CompleteView delivers everything you need to manage your video surveillance system and integrate support of analog, IP megapixel, and HD video feeds into Brivo OnAir. The integration's alarm monitoring allows users to easily monitor CompleteView camera events, such as motion detection.

## FEATURES

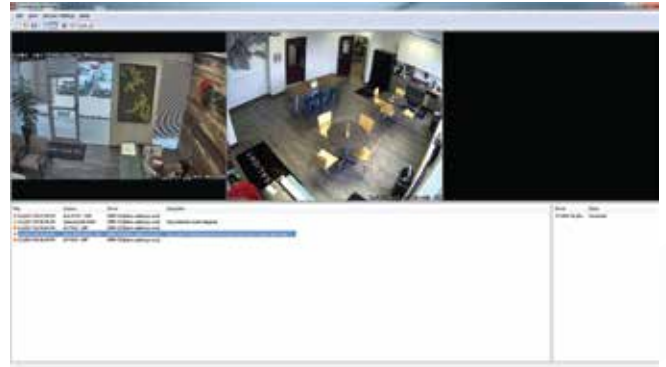

- Receive video from an unlimited number of cameras, at multiple sites, connected to multiple servers
- Display single cameras or groups of cameras on customized view layouts
- Access control events can trigger recording on cameras
- PTZ camera movement can be controlled automatically on event
- Recordings are automatically associated to access control events
- User initiated, on demand recording
- Comprehensive live and recorded video display capabilities including advanced PTZ controls
- Playback of recorded video
