

S2 NETBOX ACCESS CONTROL

With Salient's CompleteView™ Video Management System and the S2 NetBox access control system, you can correlate video with access control event information in one powerful interface. The combined solution allows full interaction between access control events, live video and recordings, providing powerful, correlated security information in a single interface.

CompleteView delivers everything you need to manage your video surveillance system – from a single server with a few cameras to a multi-server, multi-site enterprise installation with unlimited clients. Analog, IP, megapixel and HD video feeds can all be incorporated seamlessly into a S2 NetBox system. You can instantly access, monitor and review live and recorded video from any camera connected to any CompleteView recording server in the system. Additionally, video and access events are correlated in the NetBox interface allowing users to easily review recordings of security events and control camera actions. Alerts and incidents can be further reviewed through CompleteView's client investigation tools.

FEATURES

Seamless integration of CompleteView VMS and S2 NetBox

Full interaction with CompleteView live video and recordings

Incorporates analog, IP, megapixel, and HD video feeds into NetBox interface

Trigger recording on any camera and control PTZ camera movements with NetBox access control events

Simultaneous support for MJPEG, MPEG-4 and H.264 video formats

Built in support for analog cameras, IP cameras and encoders

Per-camera configuration of all video streaming and recording parameters including resolution, frame rate, schedule, motion and event recording and storage location

Display single camera or entire camera group views in the NetBox interface

Display cameras, access control and other security equipment overlaid on site maps in NetBox

Time zone consistency between CompleteView VMS and S2 NetBox

TECHNICAL SPECIFICATIONS

Integrated Solution Functionality	
Video Feature	CompleteView/NetBox

Automatic PTZ Preset Control on Alarm	Yes
Custom View Layouts with Multiple Cameras	Yes
Record Video on Alarm	Yes
Increase Recording Rate on Alarm	Yes
Recordings Automatically Associated to Alarms	Yes
Simultaneous Live Monitoring, Playback and Alarm Monitoring	Yes
Tamper Evident Recordings	Yes
Connect to Cameras from Multiple CompleteView NVRs Simultaneously	Yes
MJPEG • MPEG4 • H.264 Support	Yes

HOW TO ORDER

Please contact S2 Security at orders@s2sys.com.

- S2-VMS-B-ST Salient Video Management System Integration Option, includes integration license up to 4 cameras
- S2-VMS-C-ST Per camera integration license beyond the 4 camera licenses above

CompleteView Server Recommended Software

Operating System

Series L-N:

- Windows 10
- Windows 8.1
- Windows 7
- Windows Server 2012
- Windows Server 2008 Standard and Enterprise

Series P-S:

- Windows 10
- Windows 8.1
- Windows 7
- Windows Server 2012
- Windows Server 2008 Standard and Enterprise

S2 Netbox Client Workstation Recommended Software

Operating System

S2 NetBox:

- S2 NetBox Version 4.7 compatible with CompleteView CV 4.6.2 and higher
- S2 NetBox Version 4.5 compatible with CompleteView 4.2.2 and higher
- S2 NetBox Version 4.0 compatible with CompleteView 3.5.2 or higher

Salient CompleteView:

- CompleteView ONE, CompleteView Pro or CompleteView Enterprise - v3.5.2 or higher
- PC running Microsoft Windows 2007, Windows 10, Server 2008 or Server 2012
- Intel Pentium 4 CPU, 2.0 Gigahertz (GHz) or faster
- One Gigabyte (GB) of system memory
- One PCI/PCI-e 1x expansion slot per each Gen II video capture card
